

# Storage

140,000+ square feet of secure, state-of-the-art, environmentally controlled storage

High-tech changes can create a number of low-tech challenges for your business. For example, where can you store the new equipment before implementation? And where can you put the old equipment until it can be resold or recycled? Whether you need a staging area to prepare for a timed rollout, a place to configure or customize equipment, or even a preparation space for packaging and shipping, Data Sales Co. Storage services are the solution.

We provide short-term and long-term storage options for any type, size and quantity of business technology in two strategically located warehouse facilities featuring inside adjustable loading docks to accommodate any size truck or payload. Our Storage services come with full logistical support that includes monthly tracking reports and a range of services designed to simplify every phase of your project.

- **More than 140,000 square feet of secure, state-of-the-art, environmentally controlled storage space in multiple facilities**
- **Minneapolis and Scottsdale storage facilities with pick and ship capabilities**
