

Data Destruction

Shredding for hard drives, tape cartridges, PDAs, floppy drives, CDs and cell phones

Your business has made a substantial investment in keeping the private and proprietary information stored in your computer systems secure. And when that computer equipment is no longer in service, you want to be just as vigilant. Data Sales Co. offers Data Destruction services to give you peace of mind and help you meet security requirements.

We operate a 20HP twin-shaft Electro-Shear Shredder that produces particles from less than ¼" to 2" in diameter. Our process addresses the security requirements for HIPAA (Health Insurance Portability and Accounting Act), FACTA (Fair and Accurate Credit Transaction Act), GLB (Gramm-Leach Bliley Act) and SOX (Sarbanes-Oxley Act). Our Data Destruction services also ensure that out of service technology is recycled or disposed of in an environmentally sound fashion.

- **Data Destruction services available for hard drives, tape cartridges, PDAs, floppy drives, CDs and cell phones**
- **Shredder is housed in a secure facility owned and operated by Data Sales Co.**
- **Pick-up and transportation via Data Sales Co. fleet of trucks, outfitted with secure, sealed lockboxes**
